PROFESSIONAL SUMMARY

Results-driven Geospatial Data Manager with 19+ years of progressive experience in GIS data engineering, spatial analysis, and geospatial database management across utility, oil & gas, and technology sectors. Expert in ArcGIS Enterprise, QGIS, PostgreSQL/PostGIS, Python automation, and cloud-based spatial data infrastructure. Proven track record of building interactive dashboards, automating ETL pipelines, and translating spatial data into executive-level insight. Adept at leading cross-functional teams and delivering full-stack geospatial web applications using React, Next.js, TypeScript, and Supabase.

CORE COMPETENCIES

Geospatial Data Management • GIS Data Engineering • Spatial Analysis & Modeling • ETL Pipeline Automation • Database Administration (PostGIS, Oracle Spatial) • Cloud Infrastructure (AWS) • Dashboard Development (ArcGIS, Power BI, Tableau) • Python Scripting & Automation • Full-Stack Web Development (React, Next.js, TypeScript) • Team Leadership & Training • Remote Sensing & LiDAR • Field Data Collection (Survey123, GPS/GNSS)

PROFESSIONAL EXPERIENCE

GIS Coordinator

November 2017 – Present

Ikeja Electric, Lagos, Nigeria

- Manage and maintain geospatial data for a 3,800+ km electricity distribution network serving over 1 million customers across the Lagos metropolitan area
- Engineered Python automation scripts using ArcPy and GeoPandas, reducing manual GIS workflows by 35% and accelerating data processing turnaround
- Deployed Esri Survey123 for digital field data capture, improving collection speed by 45% and eliminating paper-based errors across field teams
- Designed and launched ArcGIS Dashboards for real-time outage monitoring, enabling 40% faster incident response and executive decision-making
- Built automated ETL pipelines integrating multiple data sources, cutting manual data processing effort by 67%
- Developed the IE Asset Dashboard and led its Next.js/TypeScript rewrite, monitoring 20,641+ distribution assets across 23 geospatial data layers with role-based access control
- Created Power BI dashboards for transformer vandalization tracking and 8,513+ uprisher field inspections with geographic mapping and performance analytics
- Built GIS KPIs Dashboard (Next.js, Firebase, TypeScript) enabling real-time tracking of team performance metrics and operational KPIs

GIS / Data Engineer Manager

September 2016 – October 2017

PoloSoft Technologies, Lagos, Nigeria

- Led a team of 8 GIS professionals, coordinating project delivery for utility and infrastructure clients across multiple concurrent engagements
- Architected BI integrations with Tableau and Power BI, enabling stakeholders to visualize spatial data alongside operational metrics
- Designed and implemented cloud-based ETL pipelines for large-scale geospatial data processing and warehousing
- Developed and delivered technical training programs, upskilling team members in GIS technologies and database management

GIS / Database Specialist

October 2012 – August 2016

SpatialMatrix Ltd, Lagos, Nigeria

- Managed PostgreSQL/PostGIS database migrations and administration, maintaining 99.9% uptime across production environments
- Optimized spatial SQL queries, achieving 50% improvement in database performance for complex geospatial operations
- Designed and delivered interactive dashboards and spatial analytics solutions for oil & gas, NGO, and infrastructure clients
- Provided end-to-end GIS services including spatial analysis, cartographic production, and database architecture design

Geologist

June 2010 – August 2012

Earth-Source Hydrocarbon, Nigeria

- Conducted field geological surveys and GPS-based data collection for hydrocarbon exploration and resource estimation
- Integrated geological field data with GIS platforms for spatial analysis and mapping of prospective zones

GIS Technician

January 2005 – May 2010

Spatial Technologies Limited, Nigeria

- Built and maintained ETL pipelines for spatial data ingestion, transformation, and quality assurance
- Performed network analysis, proximity analysis, and spatial modeling for infrastructure planning projects
- Managed GPS/GNSS field data collection campaigns and post-processing workflows for large-scale mapping

EDUCATION

Master of Science, Geographic Information Systems

University of Lagos, Lagos, Nigeria

Bachelor of Technology, Geology & Earth Sciences

Federal University of Technology, Owerri, Nigeria

TECHNICAL SKILLS

GIS Platforms: ArcGIS Enterprise, ArcGIS Pro, ArcGIS Online, QGIS, Survey123, ArcGIS Dashboards, Google Earth Engine

Programming: Python (ArcPy, GeoPandas, Shapely, PyQGIS), SQL, R, JavaScript, TypeScript

Databases: PostgreSQL/PostGIS, Oracle Spatial, SQL Server, Supabase, Firebase

Visualization: Tableau, Power BI, Power Query, Plotly.js, Recharts, Leaflet.js, Matplotlib, Seaborn

Web Development: React, Next.js, Tailwind CSS, Vercel, HTML/CSS

Cloud & DevOps: AWS (S3, EC2, RDS), Git/GitHub, Docker

Geospatial: LiDAR, Remote Sensing, GPS/GNSS

CERTIFICATIONS

- Big Data Analysis, Power Query, Power Pivot & VBA — UrBizEdge, 2022
- Python & SQL for Data Science — Edureka, 2024
- Deep Learning Specialization — Edureka, 2024
- Tableau for Data Visualization — Edureka, 2024
- Data Science & Machine Learning Programs — Edureka, 2024
- GISP Certification — In Progress (GISCI)
